

CBS News Caught Lying About #COVID-19—Again!

In late March 2020 it was [reported](#) that *CBS News* used video footage representing an overcrowded hospital room in New York City, that was confirmed to be the exact same clip used by *Sky News* reporting on another hospital in the Lombardy province of Italy.

When caught, *CBS* attributed it to an ["editing mistake"](#) that was corrected.

This was no mistake!

Some independent media called it precisely what it was: [fake news](#).

Once again *CBS* has been [caught in a big lie](#). *Cherry Health* clinic staff in Grand Rapids Michigan were told to visit an outdoor testing center to make it look like people were "getting tested in massive numbers" for *CBS*.

This fakery is probably rampant!

Films by regular citizens have shown that the mainstream media is profusely [lying about overflowing hospitals](#) in COVID-19 warzones.

Most healthcare workers will not speak out because they're concerned about job loss. To those medical professionals who are going public, thank you.
